SUMMARY

Computer Science graduate (SFU) with a full-stack web foundation (React, Next.js, TypeScript, Django, PostgreSQL) and strong fundamentals in algorithms and systems. Delivered a CMS-driven, SEO-optimized client site and am building an offline-first PWA. Seeking software development roles in Vancouver or remote in Canada.

EXPERIENCE

Frontend Developer (Contract)

KTV Working DroneFebruary 2026 - June 2026, Taichung, TW

- Developed a responsive frontend website using Next.js, React, TypeScript, and Tailwind CSS for KTV Working Drone's Taiwan business.
- Built dynamic service and news pages with reusable components, filtering, pagination, video embeds.
- Established Contentful Headless CMS and designed non-technical fields to enable co-workers to manage content easily.
- Implemented SEO foundations, including metadata, Open Graph tags, sitemap/robots support, canonical URLs, and structured JSON-LD for business, website, breadcrumbs, services, and news pages.

PROJECT

Personal Finance App

- Building an offline-first, mobile-friendly PWA for portfolio tracking, aimed at Canadian users as an alternative to spreadsheets.
- Supports depository, credit, and investment accounts, transactions, and goals, with built-in TFSA, RRSP, and FHSA handling.
- Type-safe end to end (tRPC, Prisma), with input validation and audit logging.

Multi-Agent path finding Algorithms

SFU

- Implemented Conflict-Based Search and Prioritized Planning with space-time A* to find collision-free paths for multiple agents, handling vertex and edge (swap) conflicts.
- Benchmarked on Moving AI maps (warehouses, mazes), using disjoint splitting and Dijkstra-based heuristics to reduce search-tree expansion.
- Optimized pathfinding performance by developing and integrating disjoint splitting and Dijkstra-based heuristics, reducing search-tree expansion on complex MovingAI benchmarks.

EDUCATION

B.Sc. Computer Science

Simon Fraser University · 2025

- Relevant coursework: Operating Systems, Intelligent Systems, Software Engineering, Mobile App Development.

SKILLS

Programming Language: TypeScript, C++, Python, JavaScript, HTML/CSS, Rust

Tools: Git/GitHub, Trello, Linux (Ubuntu), macOS

Frontend: React, Next.js, Tailwind CSS

Backend & Data: Node.js, Express.js, PostgreSQL, Django, tRPC, Prisma, Supabase, headless CMS
